

Display configuration files for Orbis

Last updated 1/8/2007

Structure:

Field label

MARC field or code Indicators subfield(s) Search redirect* subfield(s)*

*Search redirect and the subfields that follow aren't always present depending on the field.

Example:

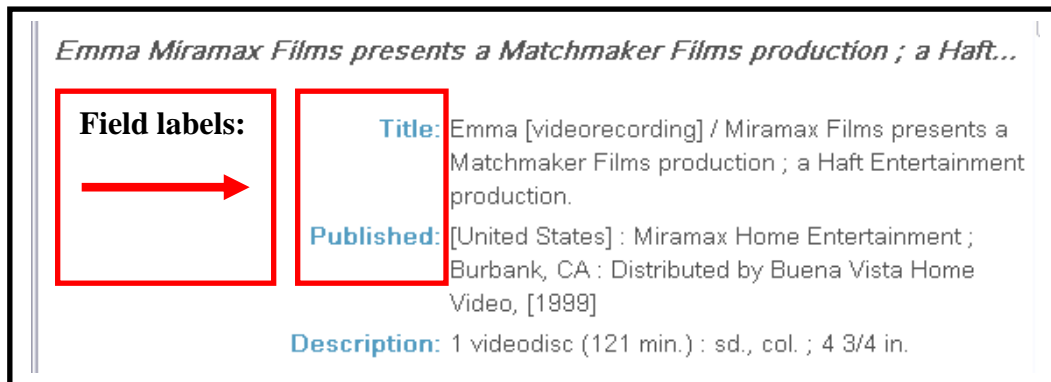

Author:

100 XX abcdefgklnpqtu A abcdefgklnpqtu

The display n .cfg files can also contain any tag, indicator, subfield combination from a MARC Bibliographic record, as well as text labels for those combinations.

Definitions:

Field Labels – flush against the left margin in the config file. This is the label for the bibliographic information as you want it to display in the Record Display.

MARC field or code – MARC code, indented 3 spaces from the left margin. If no there is no information associated with the code or MARC tag, then nothing will display (including the label). Other than MARC fields, there are also a few Voyager-specified codes such as: 5000 Database name of Bib Record, 9000 Holdings information

Example:

Database:

5000 Yale University Library Catalog

Subjects (Library of Congress): [Austen, Jane, 1775-1817 –Film and video adaptations.](#)
[Young women –England –Drama.](#)
[Feature films.](#)
[Video recordings for the hearing impaired.](#)
[England –Social life and customs –19th century –Drama.](#)

Database code and label:

Database: Yale University Library

Indicator -- follows the MARC field code (use XX if the indicator values can be anything, use a pipe symbol “|” to represent an undefined or blank indicator)

Subfield(s) – follows the Indicator and can also follow the Search redirect code

Search redirect – follows the first set of subfields. The search redirect is denoted by a capital letter, and is followed by additional subfields that guide the redirect link. You can re-direct your searches by adding a hypertext link for Author, Title, Subject, Call Number, and Date after your search display information. After the search display config information, add a space and enter:

- **A** (author)
- **T** (title)
- **S** (subject)
- **C** (call number)
- **D** (date),

followed by the subfields which you want to build as a hypertext linked display. The search responds however you have your searches set up in the opac.ini file (left-anchored and so on).

Punctuation – for example, {v--%}{x--%}{y--%}{z--%} adds a dash between terms in subfields v, x, y and z in a 6XX field.

videorecording number: 15862 Wiramax

Subjects (Library of Congress): [Austen, Jane, 1775-1817 –Film and video adaptations.](#)
[Young women –England –Drama.](#)
[Feature films.](#)
[Video recordings for the hearing impaired.](#)
[England –Social life and customs –19th century –Drama.](#)

Punctuation – dashes added

Database: Yale University Library
